# YOUR JOURNEY TO SCHOOL

BEE NETWORK

We are working to try and improve the air quality and reduce the amount of cars and traffic around our school. One way you can help us on this mission is to consider walking, scooting or cycling to and from school more often.

SCAN ME!

We're encouraging everyone at school to think about the way they travel. We want you to be able to make environmentally friendly choices for our school and our planet.

This leaflet gives you some easy ways to make sustainable travel choices such as walking, wheeling, scooting, bus, tram or train, and even park and stride.

## Walking

Walking is a brilliant option for getting to and from school, especially if you meet friends on the way!

To find the best way to walk to school, use the map on the other side of this leaflet.

## Wheeling

Don't feel too confident with your skills on wheels? Not a problem! Scan the QR code to visit TfGM Bee Active to see how we can help.

## Bus, tram or train

Unable to walk or wheel? That's okay! You can always take the bus, tram or train!

You can find information on tickets, prices and times at [beenetwork.com](http://beenetwork.com) or on the Bee Network app, which you can download through The App Store or Google Play on Android.

## Park and stride

If you have to use the car, why not give 'Park and Stride' a go? This means driving some of the way and then walking the rest. It only needs to be a short walk – five or ten minutes!

## Let's travel together

Want to make the school journey more fun, speak to your friends and see if you could travel in or home with them! Travelling together and is good for the environment! It's a win win!

Share your journey
