

<b>Overview</b>	<p>The two year course enables students to develop a critical view of the world and current Geographical concepts which are ongoing. The course is split into physical and human Geography, both of which culminate in an two and a half hour exam, and the NEA which is assessed in a written report.</p> <p>Year 13 starts by continuing to look at global systems and governance &amp; the water and carbon cycles. This again allows students to look at different physical and human contexts and Geographical issues, and critically analyse a range of situations. In year 13 students are also closely supported to enable completion of their NEA, by establishing an initial area of student &amp; question to analyse, design their methodology to collect data on the 5 day fieldtrip before completing their data presentation, analysis and final write up. Students will also be given curriculum time before the exams to complete guided revision.</p>
-----------------	---

<b>Autumn Term</b>	<p><b>HUMAN</b> <b>Global systems and global governance</b></p> <ul style="list-style-type: none"> <li>A focus on globalisation – the economic, political and social changes associated with technological and other driving forces.</li> <li>Transformed relationships between peoples, states and environments and how at a global level, people manage and govern some aspects of human affairs with a particular emphasis on international trade and access to markets and the governance of the global commons.</li> </ul>	<b>Assessment</b>
